Mobile LCD repair. A Mobile LCD (liquid crystal display) it's the main display of the mobile. Where the graphics and the animations and other content is shown to the user. If the screen or display is not working properly. Then the mobile phone is worthless because the screen is not showing you the content properly. If something same like this happens to you, then you must contact the nearest mobile repairing center they must be renown by the quality of their work. If they have a good staff you can have best results with their work. Display issue is very common and mostly they can be resolve and if the problem is still there the last option is to get a new screen for your cellular device. Mobile heat up. Mobile heat up is very common it can be a hardware issue or a software issue. If your mobile phone is consuming allot of battery and heating up both at the same time. It means there is a short circuit in the motherboard and it can be repaired but only experts can do that. If you phone is heating up only when you are multitasking on it or running too much applications on it then there is an issue in your software and you can get rid of it by installing a new software.

Camera issue. Mobile cameras are used to capture pictures and selfies. Cameras get blur after a time period. Sometimes there is a black dot on the phone display. When you turn on the camera it is because there is a dead pixel in your camera. The issues regarding to the phone camera can be solve by connecting new camera in place of the old one. Speaker issue.
